

Theory Quiz

What this project aims to accomplish is to create a simple website to display taskmanager and to do list in terms of UI. Tasks:

1. Create Front Page: All light blue, transparent doodle on the left, text 'welcome to your workspace' in bold on the right.
2. Scroll down to display list section, which shows where you left off on the right. Gives the option of Creating new tasks, projects, and assignments in notebook style on the left.
3. Scroll further down to showcase the new section. Here, updates and notifications are displayed.

The entirety of this project's interface is implemented using HTML, CSS, and Bootstrap.
